§ 01 Summary

PROFILE • POSITIONING

Senior Android engineer with cross-stack reach — Uber Maps SDK (JNI/C++), OTT / CTV streaming frameworks, broadcast-grade DRM. Ten-plus years shipping production apps across Android, Android TV, Fire OS, webOS and Tizen — including a multi-brand OTT streaming framework and 4K DRM-protected playback (Widevine, PlayReady).

§ 02 Experience

ENGAGEMENTS • 2014 → PRESENT

Nexstar Media Group, Inc.

Aug 2025 — Present • current

Senior Fire OS / Android TV Engineer • via Nimble.LA • full remote

FULL-TIME CONTRACT

- Architected an enterprise **OTT streaming framework** powering **multiple TV station brands** across Fire TV and Android TV using **MVVM + Clean Architecture** with a plugin-based integration layer for third-party services.
- Built five specialised **Media3 / ExoPlayer** implementations covering VOD, live, and audio playback with HLS adaptive bitrate.
- Shipped DRM-protected playback (**Widevine, PlayReady**) with both server-side and client-side ad insertion.
- Integrated the platform's analytics and audience-measurement stack (the platform's analytics and audience-measurement stack) under GDPR / CCPA compliance.
- Delivered TV-optimised auth (device-based), entitlement & flexible paywall, and zero-downtime feature rollouts across a large multi-brand flavor matrix via remote config; built Leanback TV UI with full d-pad navigation.
- Refactored callback chains to reactive Kotlin **SharedFlow**; resolved fragment-lifecycle leaks; wired **Firebase Crashlytics + New Relic** with JUnit, Mockk, Robolectric, Espresso coverage.

FreeCast, Inc.

Dec 2024 — Jul 2025 · 8 mo

Android / Android TV / Fire OS Engineer · full remote **CONTRACT**

- Returned to the Select TV and FreeCast Watch products across Android, Android TV, Fire OS, webOS and Tizen through to the end of the engagement.

Claro TV+

Apr 2024 — Dec 2024 · 9 mo

Android TV / Fire OS Engineer · full remote **CONTRACT VIA GLOBAL HITSS**

- Greenfield Android TV / Fire OS app for one of Brazil's largest pay-TV operators; **4K streaming** via DASH / HLS with multi-DRM.
- Architected the data layer as a shared **Kotlin Multiplatform (KMP)** submodule consumed by Android, webOS and Tizen clients.
- Multi-module **MVVM** architecture; Media3 playback; analytics across Firebase + Google Analytics 4.

FreeCast, Inc.

May 2022 — Apr 2024 · 1 yr 11 mo

Android / Android TV / Fire OS Engineer · full remote **CONTRACT**

- Led the **full migration of the legacy Java codebase to Kotlin**; introduced Use-Case + Clean Architecture and improved end-user UX.
- Implemented **HLS / DASH** playback for **live linear TV and VOD** with Widevine DRM-protected streaming; integrated Google Cast and a paid subscription gateway.
- Maintained and developed companion apps on **webOS and Tizen** alongside the Android TV / Fire OS surfaces.
- Integrated **OTA tuner platforms** (HDHomeRun, AirTV, Alticast, PDAQ) with GStreamer-based media pipelines for secure live broadcast over HLS / DASH.
- Owned **DRM, EPG, tuner orchestration, transcoding**, and multi-device streaming end-to-end.
- Shipped on Google Play (*Select TV Android, FreeCast Watch*) and Amazon (*FreeCast Watch Fire OS*).

Uber Technologies

May 2021 — May 2022 · 1 yr

Android Engineer · Maps SDK team · via Matchpoint Solutions · full remote **CONTRACT**

- Worked on the **Maps team SDK** module — JNI/C++ bindings between Uber's native Maps engine and the Android client.
- Contributed to Uber's open-source Android architecture framework (**RIBs**); shipped to Uber Rider, Uber Eats and Uber Driver.
- Operated inside a 10K+ engineer codebase using **Buck, Flipper**, custom analytics / logger / crash reporter and a feature-by-module architecture.

FreeCast, Inc.

Mar 2021 — May 2021 · 3 mo

Android / Android TV / Fire OS Engineer · full remote **CONTRACT**

- Opening engagement on the Select TV Android and FreeCast Watch codebases, starting the migration from Java to Kotlin.

Super Revendedores

Oct 2018 – Feb 2021 · 2 yrs 5 mo

Android Engineer · full remote

- Migrated the full codebase from Java to Kotlin; implemented **online payment gateway**, virtual showcases and an SSO link to a partner web ordering portal.
- Built scalable asynchronous order processing on **AWS SQS / SNS** for reliable queuing and notification delivery.

§ 03 Published Applications

APP STORE · GOOGLE PLAY · SHIPPED UNDER MY OWN DEVELOPER ACCOUNTS

Archive — Home Video Player

APPLE TV (TVOS)

Native SwiftUI tvOS client for a self-hosted media library: HLS playback, server-side transcoding, library browsing and resume across devices.

Swift, SwiftUI, tvOS, AVFoundation, HLS

Preços Cerveja

ANDROID — GOOGLE PLAY

Compares beer prices by volume to find the best value per millilitre. Offline-first with local persistence and in-app billing.

Kotlin, Jetpack Compose, Room, Play Billing

Calculadora de Cerveja

IPHONE & IPAD (IOS)

iOS counterpart of the price-per-volume comparison app, built natively in SwiftUI.

Swift, SwiftUI, iOS

§ 04 Selected Personal Work

INDEPENDENT · OPEN SOURCE · RESEARCH

Arquive — backend for the Archive tvOS app above

Self-hosted personal media archive & streaming server. In-browser **HLS playback** with GPU-accelerated transcoding cache, **IPTV** (M3U + XMLTV EPG + recording), DLNA/UPnP for smart TVs, distributed GPU-fleet transcoding, FAISS-backed face recognition, local-AI captions via Ollama, plus a native **Apple TV (SwiftUI)** client.

Python React HLS · GPU Transcoding

FAISS · InsightFace Ollama · Qwen2.5-VL DLNA

M3U · XMLTV SwiftUI tvOS

DynamicMusicApp

Android music player with **three pluggable design systems** users switch at runtime — *Material You* (Google), *Neon Wave* (synthwave), and *Organic Flow* (botanical). One Compose codebase, three radically different visual identities — design-system theming treated as a first-class architectural concern.

Kotlin Jetpack Compose Material 3 MVI

Coroutines / Flow Hilt

Socials Automator

End-to-end Instagram carousel generator — AI writes the captions, AI generates the images, then auto-posts. Live at [@ai.for.mortals](#). Runs on **100% local AI** (LM Studio + ComfyUI) at zero cost, with cloud fallback (Z.AI, OpenAI, Groq, Gemini, fal.ai). Smart slide-count selection, post-history awareness, scheduled loop mode.
